Motion Control Systems invites you to our free training programme

### Introduction to SK Inverters – Free half day training

We have decided to offer our customers free Control Technique inverter training. Please see <http://www.motioncontrolsystems.co.uk/categoriesList/816/ct-inverters.aspx> for more information.

We shall be running this free training every Thursday from 18<sup>th</sup> August 2011 for several weeks.

Due to limitations of training equipment we will have a limited number of customers each week, but you can send engineers each week until all your staff have been trained.

The first series of course will be on the Control Techniques Commander SK range. Details of training as follows:

Cost: Free

Time: 9am-1pm every Thursday

Coffee: 08.45am + 10.45am

Items covered: Wiring up inverters and programming for the following

- Standard start stop with ramp up and down
- Up to four preset speeds
- Potentiometer speed selection
- Potentiometer speed selection with three preset speeds
- E-POT control – adjusting speed using remote inputs
- Latching start
- Voltage boost at start up
- Recording all settings onto a memory card
- Viewing kilowatts per hour usage
