CLICK CPU Module Specifications

C0-00DR-D

8 DC Inputs/6 Relay Outputs

CLICK PLC CPU, 8 DC input/6 Relay output, 8K steps total program memory, Ladder Logic programming, built-in RS232C programming port and additional RS232C Modbus RTU/ASCII communications port (configurable up to 115200 baud). Inputs: 8-pts 24 VDC Sink/Source inputs, 2 commons, isolated. Outputs: 6-pts 6-240 VAC/6-27 VDC Form A (SPST) relays, 1 A/pt, 2 commons, isolated. Removable terminal block included, replacement ADC p/n C0-16TB.

General specifications (all CLICK PLC products)

These general specifications apply to

These general specifications apply to all CLICK CPUs, optional I/O modules, and optional power supply products. Please refer to the appropriate I/O temperature derating charts under both the CPU and I/O module specifications to determine best operating conditions based on the ambient temperature of your particular application.

Environmental Specifications				
Operating Temperature	32°F to 131°F (0°C to 55°C) IEC 60068-2-14 (Test Nb, Thermal Shock)			
Storage Temperature	-4°F to 158°F (-20°C to 70°C) IEC 60068-2-1 (Test Ab, Cold) IEC 60068-2-2 (Test Bb, Dry Heat) IEC 60068-2-14 (Test Na, Thermal Shock)			
Ambient Humidity	30% to 95% relative humidity (non-condensing)			
Environmental Air	No corrosive gases The level for the environmental pollution is 2 (UL840)

Product Dimensions and Installation

It is important to understand the installation requirements for your CLICK system. Your knowledge of these requirements will help ensure that your system operates within its environmental and electrical limits.

Plan for safety

This catalog should never be used as a replacement for the user manual. You can purchase, download free, or view online the user manuals for these products. The CO-USER-M is the publication for the CLICK PLC. This user manual contains important safety information that must be followed. The system installation should comply with all appropriate electrical codes and standards.

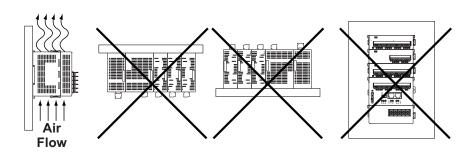

NOTE: There is a mimimum clearance requirement of 2" (51 mm) between the CLICK PLC and the panel door or any devices mounted in the panel door. The same clearance is required between the PLC and any side of the enclosure. A minimum clearance of 3" (76 mm) is required between the PLC and a wireway or any heat producing device.

Mounting orientation

CLICK PLCs must be mounted properly to ensure ample airflow for cooling purposes. It is important to follow the unit orientation requirements and to verify that the PLC's dimensions are compatible with your application. Notice particularly the grounding requirements and the recommended cabinet clearances.

Product Dimensions and Installation

Connecting the modules together

CLICK CPUs, I/O modules and power supplies connect together using the extension ports that are located on the side panels of the modules (no PLC backplane/base required).

- 1) Remove extension port covers and slide the latch tabs forward.
- Align the module pins and connection plug, and press the I/O module onto the right side of the CPU.
- 3) Slide the latch tabs backward to lock the modules together.

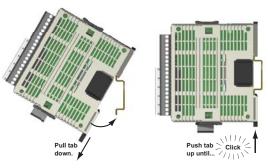

Mounting

The CLICK PLC system, which includes the CLICK power supplies, CPU modules, and I/O modules, can be mounted in one of two ways.

- 1) DIN rail mounted
- 2) Surface mounted using the built-in upper and lower mounting tabs.

DIN Rail Mounting

Surface Mounting

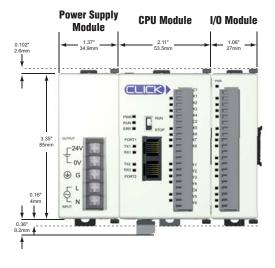

Unit dimensions

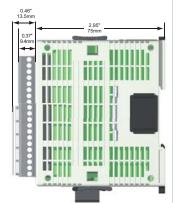

These diagrams show the outside dimensions of the CLICK power suppy, CPU, and I/O modules. The CLICK PLC system is designed to be mounted on standard 35mm DIN rail, or it can be surface mounted.

Allow proper spacing from other components within an enclosure.

Maximum system:

Power Supply + CPU + 8 I/O modules.
